Gerd Maack is working at the German Environment Agency (UBA) in the Department of Pharmaceuticals. One of his main tasks is assessing the environmental impact of veterinary and human medicinal products. Therefore, he regularly is in liaison with the European Medicines Agency (EMA). Additionally, he is working in the interface of research and policy advisory on national and EU-level. He is involved in development of regulatory guidance documents both on OECD and EU-level. Gerd is specialized in endocrine disruptors in the aquatic environment and is supervising several UBA sponsored research projects in this area. Since May 2018 Gerd is chairing the SETAC Pharmaceutical Interest Group.
